Profile

I am a graduate from Kenyatta University, I did a bachelors course in Mathematics and Computer Science. I am a software developer mostly I specialize in web development and Data analysis. I love developing. I have been coding for about three years now. I use; JavaScript, Python, NodeJS, Mongo DB, MySQL, Angular, React, HTML5, CSS, Bootstrap and Angular Materials. Apart from coding, I do online writing and transcribing as a part time job.

Employment History

Full Stack Web Developer at Fleetsimplify (Instadriver)

November-to-December 2021

I was a full-stack web developer at Fleetsimplify for two months where I help in developing api's and performing integration with Frontend UI components using react-redux. We were basically developed two modules.

JavaScript Mentor at Andela Kenya

April 2019-December 2019

I was a Mentor (**JavaScript Mentor**) in the Google **Africa Developers Scholarship ALC-4**. I used to mentor novices during their projects and assignments. I was also a meet ups organizer. I used to review others developer's codes and helped in debug and updating code. I helped also in documenting group projects.

Cloth Draper at Gikomba Kenya

November 2019 to present

As a part time stuff I help my uncle to sell second hand clothes at Gikomba.

Education

Bachelor of Science (Mathematics and Computer Science at Kenyatta University, Nairobi)

August 2017-April 2021

Working with computers was always my dream. Taking a course in Mathematics and Computer Science has been a great thing for me, I have been able to discover the power behind computers and have had the chance work with great tools and technologies

Kenya Certificate of Secondary Education.

February 2013-December 2016

I completed my Kenya Certificate of Secondary Education and got 73/84 is approximate to grade B+
